

In 2016, the Institute of Social Sciences (University of Lisbon) decided to prepare a three volume publication in English based on its 2015/2020 Strategic Programme: *Changing Societies: Legacies and Challenges*. Each volume focuses on one of the programme's main research areas: *Inclusion, Citizenship and Sustainability*. The publication foregrounds the Institute's work and, through the 48 texts included, disseminates its researchers' innovative contributions to the social sciences. This publication is a clear sign of the ICS community's remarkable collaborative vitality. This high quality research, now accessible to a vast international readership, highlights the virtues of interdisciplinarity in science practice, one of the pillars of ICS-ULisboa.
