

Rita Borges Chaves da Costa

Rita Chaves Costa completed Statistics and Information Management (licenciatura terminal) in 2009 by Universidade NOVA de Lisboa (NOVA IMS), Knowledge Management and Business Intelligence postgraduate in 2012 by Universidade NOVA de Lisboa (NOVA IMS) and Visual Communication of Information specialization diploma in 2022 by ISCTE. She successfully completed the Google Data Analytics Specialization in 2022/03 by Coursera Inc, the Monitoring and Evaluation Certification Programme in 2022/12 by International Training Centre of the International Labor Organization (ITCILO) and Strategic Foresight: Leading in an Uncertain and Fast-changing World training in 2023/07 by IF Insight & Foresight. Since 2023/09 she is a student of the Population Sciences PhD from Universidade de Lisboa. This interdisciplinary program is a joint PhD between four ULisboa schools - Instituto Superior de Ciências Sociais e Políticas (ISCSP), Instituto de Ciências Sociais (ICS), Instituto de Geografia e Ordenamento do Território (IGOT) and Instituto Superior de Economia e Gestão (ISEG) - that got together to offer this unique programme that relies on a scientifically diverse and highly qualified faculty, with international experience. Rita works as a Monitoring Officer at PlanAPP - Competence Centre for Planning, Policy and Foresight in Public Administration since 2021. She is involved in several projects. In RH Saúde project she was responsible for the data analysis as well as the construction of a dashboard focused on the characterization and evolution of the Health Workforce from 2017 to 2023. The aim of this study is to support the production of data for an analysis of the health labour market in Portugal, along the lines proposed by the World Health Organization (WHO), as a recommended first step in a planning exercise for Human Resources for Health (HRH) or the health workforce. The report and dashboard can be reached in the following link <https://www.planapp.gov.pt/estudo-sobre-profissionais-sns/>. In the Key Context Indicators for Decision Support project, where she also has the role of project manager, the aim is to have a set panel of indicators that provide a snapshot of the country's situation and performance of the country in terms of economic, social, and environmental development and, whenever possible/pertinent, in a comparative manner with data for the European Union as a whole. This monitoring system is connected to a dashboard that allows for decision making and public policies design. The indicators are updated regularly regularly with the integration of APIs and the panel of indicators in reviewed on an annual basis. All the indicators are indexed to a strategic challenge (governance, climate change, demography, inequalities, or innovation), to a thematic area (agriculture, environment, inequalities and poverty, digitalization, economy, education, employment, energy, governance, housing, innovation, population, health, and territory) as well as a Sustainable Development Goal. She is also implementing a monitoring tool to understand how Portugal is doing against the goals defined in the Major Options bill. In the Demography and Public Policy Project, she is involved in the organization of a series of monitoring talks in order to to support the curation of a panel of indicators dedicated to demographic issues – low fertility, ageing, migration and housing.
