EPOCA: Corruption and Economic Crisis, A Dangerous Combination: Understanding Process-Result Interactions in Explaining Support for Democracy

The aim of this work is to discuss the lessons learned after cataloguing the existing questions on corruption and their caveats and improvements. More than simply stressing limitations or potentialities of the most traditional surveys on corruption, this paper presents the evolution of the development of questions on corruption and takes a closer look at innovative country-level questionnaires and at experimental methods in the field to offer new perspectives to the act of asking about corruption.

VOLUNTARY WORK

Science on the square

We promote knowledge exchange between undergraduate students and the community of Viçosa and provide, in a practical and simplified way, which kind of research studies UFV develops. After that, we expose what the local community says is important and interesting.

High School Visits

We do an introduction about what the Federal University of Viçosa is, how it works, what its courses are and how to join it. UFV students are able to bring to the high school some of their academic experiences, personal histories, difficulties overcome and future path. Thus, the purpose is to instruct high school students about what the university is and to inspire them to dream and chart their ways.

One day at the University

The objective is to promote integration of high school students into the academic routine of undergraduate students and clarifying doubts about the choice of course to be followed. Each high school student is invited by a UFV student to follow him or her on a university visit. Thus, the high school students assume for one day the functions of a undergraduate student.

Academic League of Criminality

Academic League is academic spaces that encourage scientific, cultural and social activities for the institution's internal and external community. The

majority of students is undergraduate and graduate students. We promote social Activities: i) research for the community; ii) partnerships (Police, University, Public Securite); iii) exposition “The importance to research criminality”; and iv) “Discussion Groups” about criminalities theories.
